45 of 164 countries grew their economy while cutting CO_2 from 2005 to 2022, and 27 cut the emissions of what they consume too

CO_2 from fossil fuels and industry; GDP at 2011 prices; bubble area is population; the 45 are home to 16 % of the people

Asia · Europe · North America · Africa · South America · Oceania

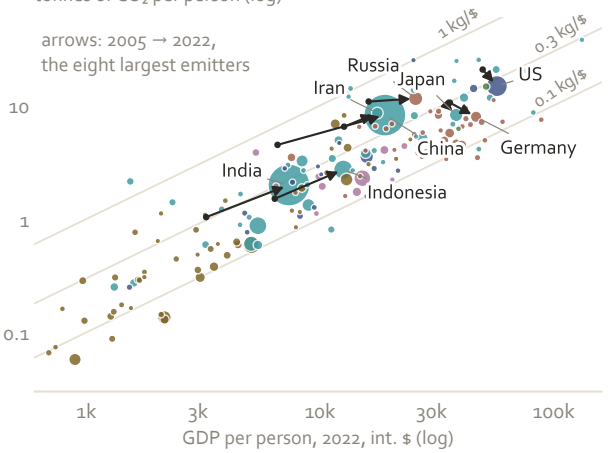

a Growth and emissions, every country

change in territorial CO_2, 2005–2022, %

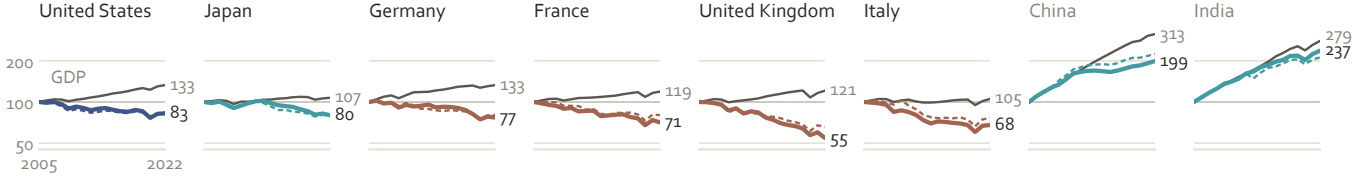

b Emissions and income per person, 2022

tonnes of CO_2 per person (log)

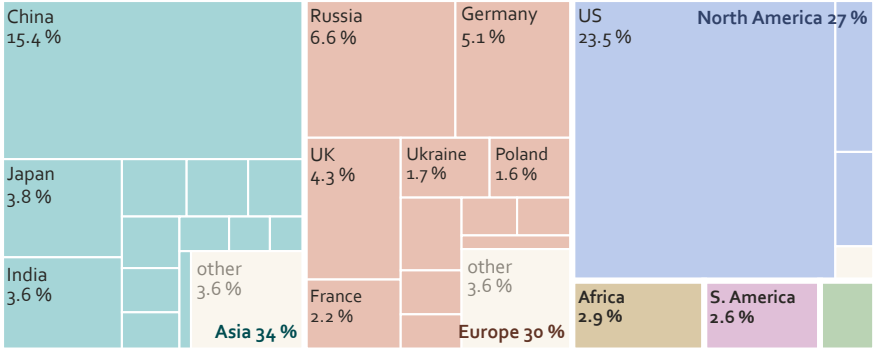

c Decoupled, and not: six large economies against China and India

index, 2005 = 100 (log) · grey: GDP · solid: territorial CO_2 · dashed: consumption-based CO_2

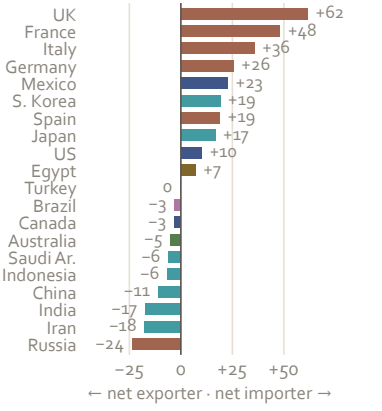

d Cumulative CO_2, 1850–2024

share of the world's fossil and industry CO_2, by continent and country

e Trade gap, 2022

consumption over territorial CO_2, %
